EDUCATION

California State University, San Bernardino

B.S. Computer Engineering — ABET-accredited (EAC)

Expected May 2028

- Cumulative GPA: 3.73
- Dean's List — Spring 2026
- Member, Computer Science and Engineering Club — Fall 2026

Chaffey College

Coursework toward transfer to CSUSB

Summer 2022 – Fall 2025

- Dean's Honors — Fall 2024, Fall 2025 (3.73 GPA)

RELEVANT COURSEWORK

Discrete Mathematics, Computer Networks, Computer Security Basics, Intro to Computer Programming, Computer Science I (in progress), Calculus I (in progress)

PROJECTS

cstrack — Counter-Strike Match Tracker

Python (standard library only)

github.com/ocul1/CLI-CS-Stat-Tracker

July 2026

- Built a zero-dependency CLI that logs matches to JSON and reports K/D and win rate using only argparse and json.
- Designed an add / list / stats subcommand interface with typed arguments, rejecting malformed input at parse time.
- Handled failure cases the happy path hides: malformed JSON falls back to an empty dataset, and zero-death aggregates avoid a division-by-zero crash.
- Rewrote an earlier prototype from scratch after learning argparse, turning it into a scriptable, composable tool.

WriterDeck — Journaling CLI

Python

github.com/ocul1/writerdeck

April – July 2026

- Wrote a terminal journaling tool that logs multi-line entries to a timestamped file with author and title.

EXPERIENCE

Hardware Store

Fulfillment Associate — previously Cashier

June 2022 – Present

- Promoted to Fulfillment Associate in April 2025 after three years as Cashier; duties grew to include returns-desk service and training associates. 8+ trained across both roles.
- Coordinate 15+ deliveries per shift, verifying orders and resolving exceptions before they reach the customer.
- Served 100+ customers daily at the returns desk, resolving warranty, payment, and credit card issues.
- Recognized with Employee of the Month, Returns Desk MVP, and a Certificate of Outstanding Performance.

TECHNICAL SKILLS

Languages: Python, Bash, HTML/CSS

Tools: Git, GitHub, GDB, Neovim, LM Studio

Environments: Linux (Arch, Ubuntu), macOS, Windows

SELF-DIRECTED LEARNING

- Python Programming MOOC (University of Helsinki) — in progress.
- Computer Systems: A Programmer's Perspective — self-studying x86-64 architecture and assembly.
